

MiniKindle Application

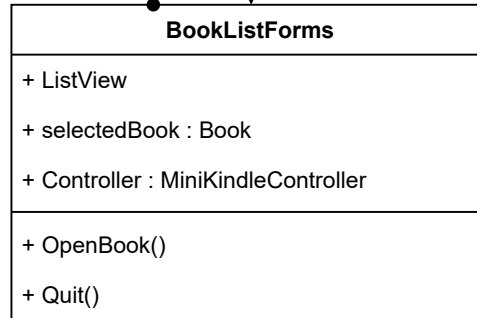

Taylor, Kevin, Max (Team 4)

Program

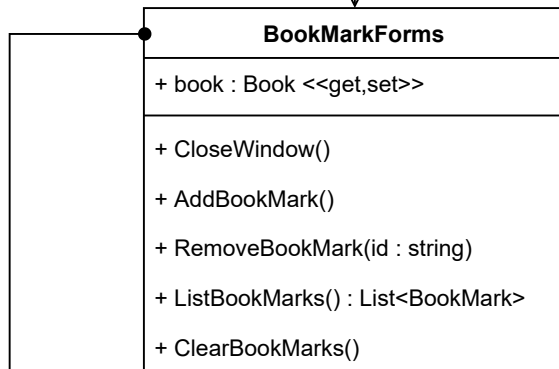

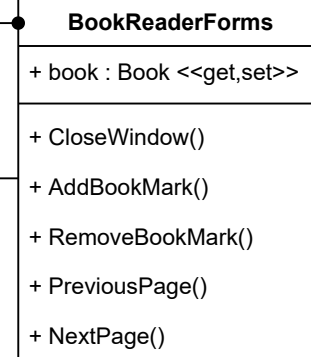

Run()

Added more information to explain our process (why we did what we did)

Once the book marks have been changed in the book, we will simply call 'update book' in MiniKindleController

Once the book marks have been changed in the book, we will simply call 'update book' in MiniKindleController

```
public void UpdateBook(Book book)
{
    var oldbk = _bookList.Find ((x) -> x.id == book.id);
    book.id = oldbk.id;
    _bookList.Remove(oldbk);
    _bookList.Add(book);

    Sync(); //sync is set to write by default
}
```

Once the book marks have been changed in the book, we will simply call 'update book' in MiniKindleController
